

MICHAEL VYTLINGAM

michael.vytlingam@gmail.com | michaelv.ca | linkedin.com/in/mikevyt | github.com/mikevyt | 416-305-1757

Technical Skills

Languages: TypeScript, JavaScript, Python, Go, Rust, Dart, C/C++, MATLAB, Bash, SQL, HTML, SASS

Frameworks: React, Redux, Vue, Express, JEST, React Testing Library, Flutter, Electron, Flask, Django

Datacentric: MongoDB, PostgreSQL, Snowflake, TensorFlow, GraphQL, Numpy, Pandas, Matplotlib

Tools: Git, Docker, Figma, Firebase, Jenkins, AWS, Jupyter Notebook, vim

Experience

- Software Engineer** Sept. 2022 - Present
Snowflake - Data Marketplace Experience San Mateo, CA
- Software Engineering Intern** May 2021 - August 2021
Snowflake - Data Marketplace Experience San Mateo, CA (Remote)
- Creating new and captivating experiences on the Snowflake Data Marketplace product in **React** and **Express**
 - Working alongside product managers, designers and release teams to ensure features release in a timely fashion
 - Built reusable and **React** component for **UI framework** used org-wide, with consideration for **accessibility**
- Machine Learning Engineering Student** Sept. 2020 – Dec. 2020
BlackBerry – QNX Open Source and Safety Compliance Team Ottawa, ON (Remote)
- Improving efficiency of **NLP-based**, open-source license detection pipeline written in **Python** using **fastText**
 - **Reduced file crawling time by 70%**, introducing **multiprocessing** and **multithreading**
- Full Stack Developer Intern** Jan. 2020 – Apr. 2020
CryptoNumerics - Protect Team Toronto, ON
- Built and shipped new features for cross-platform **Electron** app used for CSV dataset privacy protection
 - **Led front end application overhaul**: added support for **ES6**, **SASS**, unit testing, and linting; **restructured Redux store** to handle application state only; **introduced React Hooks** and new container **component pattern**
 - Developed internal **report generation microservice** in **Java** based on Pentaho, consumed in all company products
 - Enforced test driven development using **JEST**, **Spectron**, and **Azure DevOps CI pipelines** preventing regressions
- Undergraduate Research Assistant** Sept. 2019 – Dec. 2019
University of Waterloo Waterloo, ON
- Trained real-time object detection model of kitchen items using **Darknet's YOLO** for pasta-cooking robot in **Python**
 - **Increased** model's pan detection **accuracy by 28%**, introducing **synthetic data** with improved labeling
- Software Engineering Intern** May 2019 – Aug. 2019
Grain Discovery Toronto, ON
- Utilized **React**, **Redux**, **DeckGL** and **Express** to build commodity trading, progressive web application
 - **Decreased local front end build time by 23%**, adding dependency and image optimization to **Webpack**
 - Practiced **agile** and **scrum methodologies** in a fast-paced pre-launch startup environment
- Software Engineering Intern** Sept. 2018 – Dec. 2018
ENGINEERING.com – ProjectBoard Team Toronto, ON
- Worked extensively in **Vue**, **Vuex**, **Go** and **MySQL** on project collaboration platform with **2M+ monthly users**
 - Built dashboard to visualize user analytics in **Vue**, created RESTful endpoints using **Go** and **SQL**
 - Wireframed and built new home and profile pages in **Vue** and **Vuex** with **overwhelmingly positive user feedback**

Education

- University of Waterloo** Sept. 2017 – May 2022
Candidate for BAsC in Mechanical Engineering, Artificial Intelligence Option Waterloo, ON
- Coursera: Machine Learning by Andrew Ng
 - Relevant Courses: Programming for Performance, Data Structures & Algorithms, Co-operative and Adaptive Algorithms, Computational Intelligence, Pattern Recognition

Projects

- Pancho's Bakery Store Manager** | *Flutter (Dart), Firebase, Google Cloud Functions, Square* Jun. 2020 – Aug. 2022
- **iOS/Android production app** commissioned by Toronto bakery to manage employees, sales and inventory at stores
